Here is a guide of the Referee Signals for player uniform numbers. This will help the scorers to be able to enter the information correctly onto the scoresheet for when fouls are called against a player

These are displayed in the direction when the Referee would be facing the score bench

If you didn't hear the number they called remember you can always ask the Referee to clarify their signal.

All uniform numbers beyond the ones displayed here are done by a single hand signal.

ie: 21 - would be 2 fingers followed by 1 fingers

35 - would be 3 fingers followed by 5 fingers

This is why uniforms numbers allowed are between:

4-15, 20-25, 30-35, 40-45 & 50-55
